

Model No: Y1009ZU-BK

ASSEMBLY INSTRUCTIONS

1. Mark the mounting holes on the wall (A) according to the hole spacing on the mounting plate and drill holes on the wall.
2. Gently tap the expansion bolts (B) into the holes on the wall with a hammer.
3. Attach the mounting plate (C) to the wall using the nuts (D) to secure.
4. Attach the lamp body (E) to the mounting plate (C) on the wall using the screws (F) to secure.

Please consult a qualified Electrician if you are not familiar with electrical wiring.

Notes:

1. The remote control works fine within the distance up to 5 meters with sufficient power. Please replace the battery when you find that the battery is low or the remote controller does not work.
2. The remote controller needs to be aligned with the center of the lamp. The distance between the remote controller and the lamp should not be blocked by pillars.
